Career Objective

Seeking a position to apply my skills and expertise as a professional web developer.

Programming is more than a skill – it's a hobby and a source of continuous self-development for me. I enjoy staying up to date with the latest advancements in web development and finding solutions to complex challenges.

Thanks to my IT and business background, I can bridge the gap between technical expertise and business needs. I am patient, attentive to details, and a good team player in agile environments, though don't mind working alone if needed. I believe all conflicts can be solved (or even prevented) through communication.

Skills Summary

Web Development.

Skilled in JavaScript, React.js, Node.js, and database and cloud (AWS) technologies, with hands-on experience in creating dynamic and responsive web applications. Strong understanding of front-end and back-end development principles, along with expertise in utilising frameworks and libraries (such as Next.js) to deliver user-centric solutions.

Business Analysis and Documentation.

Skilled in analysing business requirements (I took part in several IT projects as a business analyst), gathering stakeholder needs, and translating them into comprehensive documentation. Proficient in creating functional specifications to ensure effective communication between stakeholders, technical and non-technical teams and creating user-friendly solutions.

Software Testing.

Experienced in implementing testing strategies, creating test scenarios and test cases, and executing manual functional and regression tests to ensure the quality and reliability of software applications. Skilled in locating bugs and creating comprehensive bug reports. Familiar with various TMSs and tools for test automation, such as Jest, Cypress, Mocha+Chai+Sinon.

Teamwork.

Adept at collaborating with cross-functional teams, including developers, designers, and stakeholders, to achieve project objectives. Strong interpersonal and communication skills, with a proven ability to foster a collaborative and inclusive work environment that promotes effective teamwork and maximizes productivity. I have several successful IT projects launched.

Self-development.

Committed to continuous learning and professional growth, consistently staying updated with the latest industry trends and best practices. Proactive in seeking new opportunities to enhance skills and expand knowledge, with a strong drive to adapt to evolving technologies and deliver innovative solutions.

Experience Summary

IT Project Coordinator - Velvetech

July 2021 – March 2023

Technical Project Coordinator - Avtomatika-Servis

December 2020 – July 2021

Senior Business Analyst / Business Analyst - Delovye Linii

April 2016 – December 2020

Senior Logistics Specialist - Delovye Linii

June 2012 – April 2016

Logistics Specialist - DL-Trans

December 2010 – June 2012

Logistics Specialist - SK-Graft

September 2010 – December 2010

Education

Qualifications

Economic Manager	Economics and Construction Company Management <i>Vologda State Technical University, Russia</i>	2008
Master of IT	<i>Whitireia New Zealand (Te Pūkenga)</i>	2023

Professional Development

Advanced training:	Project management and enterprise business processes <i>St. Petersburg State University of Economics</i>	2016
Postgraduate course:	Intelligent Systems (Machine Learning) <i>Peter the Great St. Petersburg Polytechnic University</i>	2022

Detailed Experience

IT Project Coordinator – Velvetech **July 2021 – March 2023**

- * Participation in various IT projects as a project coordinator, business analyst, and software tester (the role depends on the project) at all stages of the project life cycle.
- * Development of a website (using Wix.com) for a legal company.
- * Coordination and organizing of three teams of developers.
- * Interaction and meetings with clients and product owners, organizing effective communication between team members.
- * Definition of the scope of projects and assessment of their costs.
- * Controlling changes, risks, and open issues in projects.
- * Preparation of regular project reports.

Technical Project Coordinator - Avtomatika-Servis **December 2020 – July 2021**

- * Technical project coordination of two complex software development projects (with a development team of more than 30 people).
- * Formalization of business processes and functional requirements, including the evaluation of their costs.
- * Preparation and updating of project documentation.
- * Organization of effective communications between stakeholders, analysts, developers, and other departments.

Business Analyst - Delovye Linii **April 2016 – December 2020**

- * Business analysis for developing corporate information systems for operational, financial, and managerial accounting of transport and logistics companies (100 or more users) with integration with other information systems.
- * Engineering and reengineering transport and logistics business processes.
- * Organization of business support (documentary and contractual support, reporting, interaction with suppliers, and IT companies).
- * Implementation of electronic document management.
- * Participation in IT projects (both Waterfall and Agile) as a business analyst, project coordinator, and product owner.
- * Participation in the development and testing processes of new and existing solutions.

Senior Logistics Specialist - Delovye Linii **June 2012 – April 2016**

- * Participation in projects to create a vehicle queue management system in distribution centres, the creation of LTL transportation management systems, and the production schedule.
- * Coordination of a group of employees (logistics specialists), recruitment, and conducting interviews.
- * Monitoring the implementation of the necessary performance indicators, and load distribution within the group, ensuring smooth operation.
- * Addressing issues requiring the participation of a senior logistics specialist.
- * Interaction with the customer service department, and trucking enterprises.
- * Fulfilment of instructions of the management, and reports.

Logistics Specialist - DL-Trans **December 2010 – June 2012**

- * Maintaining a fleet of assigned vehicles.
- * Controlling movements and monitoring the performance of vehicles.
- * Informing drivers about assignments. Liaising with the customer service department and the transport department.
- * Fulfilment of instructions of the management, and reports.

Logistics Specialist - SK-Graft **September 2010 – December 2010**

- * Preparation of orders for delivery.
 - * Monitoring and control of deliveries.
 - * Communication with transport companies.
 - * Fulfilment of instructions of the management, and reports.
-

Technical skills

HTML, CSS

- * Proficient in creating structured and visually appealing web pages using HTML and CSS, ensuring a seamless user experience and responsive design across different devices.
- * Experienced in utilizing CSS (such as SASS and LESS) preprocessors and libraries (such as Tailwind, Bootstrap, and) to enhance the styling and layout of web applications.

Javascript

- * Skilled in JavaScript programming, leveraging its powerful features and functionalities to create interactive and dynamic web applications.

React.js

- * Experienced in building modern and scalable user interfaces using React.js and related libraries such as Redux, Tailwind, Radix, Material UI and others.
- * Skilled in working with React components, managing state, and utilizing React Router for efficient client-side routing.
- * Familiar with testing React applications with Jest.

Node.js + Express.js

- * Capable of building server-side applications, creating RESTful and GraphQL APIs, and handling server-side logic with Node.js, Express.js, or Next.js
- * Familiar with using Typescript.

SQL, NoSQL Databases

- * Skilled in working with SQL databases (mostly, MySQL), to design, query, and manage relational databases.
- * Proficient in utilising NoSQL databases (mostly, MongoDB), leveraging their flexibility and scalability for data storage and retrieval.

Cloud computing (AWS)

- * Knowledgeable in cloud computing concepts and experienced in working with Amazon Web Services (AWS).
- * Experienced in deploying and managing web applications on AWS, utilizing services like EC2, S3, and RDS for scalable and reliable cloud infrastructure.

Other languages I have experience in: PHP, Python

Other skills: Project Management: Jira, Confluence, MS Project, Gantt Charts

Business analysis: BPMN, User Stories, Use case Modelling SWOT and PESTLE Techniques, MS Visio

Software testing: Jest, Mocha+Chai+Sinon, Cypress, Selenium, Testrail, Test suits/cases, Bug reporting

Project Experience

I have experience working as an IT project coordinator, business analyst, and software tester in various IT projects. The most exciting for me were:

Web application for repair technicians of one of the largest American reverse logistics companies

My role in the project: Business analyst, software tester

The goal of this project was to provide a module that makes automated decisions on what products (mostly, electronics) should get repaired based on data collected throughout the repair and harvesting of spare parts processes. The web interface provides the opportunity to repair technicians to mimic the real repair process and record all the related events.

Web platform for a legal and risk management company

My role in the project: Business analyst, developer (Wix)

An online platform/database where all incident, medical record, and claim-related information can be easily entered by numerous medical facilities around the USA and simultaneously and instantaneously shared and accessed by all necessary parties.

B2B Wholesale Marketplace for one of the largest American electronics resellers

My role in the project: Project Coordinator

The website empowers customers with the tools they need for a premium wholesale buying and selling experience. It is the first platform to allow mixing and matching products, making intelligent buying decisions based on sales history data, and taking advantage of volume discounts.

Interests

I love spending my spare time swimming and hiking. I am also into playing computer, console and board games, reading and listening to science fiction books, watching Si-Fi tv shows and socializing with my friends.

I'm keen on travelling and exploring new places across the globe, and, of course, honing my web development skills.
